TEAM SCORING.

For the new clubs to the league (and probably some of the others!), the league includes incomplete teams in the results as encouragement to the smaller clubs. Incomplete teams are placed after complete teams irrespective of their points total (made up by including 'last place + 1' for the missing runner). Teams with two runners then follow and finally teams with one runner.

"WOULD YOU BELIEVE IT?"

All you mathematicians out there, can you calculate the probability (or is it chance) of two unrelated runners with the same initial and surname finishing in adjacent positions in a race??

Well it happened in our first league meeting, not once, not twice, BUT THREE TIMES in separate races. The veteran N Jones' from Warrington and Crewe/Nantwich in the mens race, the L Wood's from Stockport and Warrington in the Under 15 Girls and the M Taylor's from Manchester and Warrington in the Under 15 Girls. Warrington seem to be a common factor! Probably more chance of winning the National Lottery than this happening again.
